

## ABOUT THE PROJECT

This nation-leading ophthalmological institute uses the latest technology in training doctors to diagnose, treat and protect their patients' eyesight. When designing a new state-of-the-art facility, a welcoming environment and the ability to easily incorporate new tools and techniques were crucial. DIRTT's solution provides easy access to imbedded technology, while DIRTT Power facilitates future changes and helps to maintain a clean, uncluttered aesthetic. Medical-specific features include handy glove dispensers in the millwork and medical gas outlets.

## SOLUTIONS

- Butt Hinge Doors
- Pivot Doors
- Barn Doors
- Solid Walls
- Glass Clerestory
- Glass Walls
- DIRTT Power
- Imbedded Millwork
- Seismic
- Card Readers
- Mag Locks

## FINISHES
