

## ABOUT THE PROJECT

DIRTT's story resonates far beyond the broad variety of solutions and finishes our San Diego Distribution Partner incorporated into their bold new Green Learning Center. Leveraging DIRTT efficiencies such as sliding doors, imbedded technology and freestanding offices they were able to create a bright, open space with plenty of meeting rooms and private spaces – in half the footprint of their prior layout. Existing DIRTT components were incorporated into the new design, once again proving that changing your space doesn't mean you have to start from scratch. "We're doing significantly more business with added staff in a smaller area," our DP says. "Our space is stunning, it supports collaboration of our people, and it is inspiring for our customers."

## SOLUTIONS

- Combination, solid, cladding, glass clerestory and glass walls
- DIRTT Power, Healthcare Power
- Millwork, java center
- Bespoke ceiling
- Cornice and Seismic
- Healthcare Optifiller
- Acoustical management
