

ABOUT THE PROJECT

This leading global engineering and construction firm created a distinctive, engaging and unconventional meeting / collaboration space when it renovated its headquarters. Angled surfaces, laser-cut decorative panels and tiles arranged in geometric patterns draw visitors into the space. Monitors imbedded in walls, work-height tech tables and even a low-rise coffee table keep digital business tools only a touch away. Graphics mounted behind highly durable Corning® Willow® Glass capture the company's history and successes. It's a fully customized, efficient and inspirational space delivered in only six weeks – quality and a time frame that conventional construction could not meet.

SOLUTIONS

- Butt hinge, pivot, barn and frameless glass barn doors
- Combination, solid and cladding walls
- Glass, laminated and glass clerestory walls
- DIRTT Power, DIRTT access floor
- Millwork and imbedded millwork
- Laser-cut steel panels

FINISHES

- Enzo Approach
- Corning® Willow® Glass
- Back painted and clear tempered glass
- Chromacoat and powder coat
- Micro-perforated
